To whom it may concern,

I recently invited Joe Kenney and his "Crazy Critters" to perform a show in my sixth grade classroom at the Woodsdale Elementary School in Abington, and I must say it was an extremely informative and enjoyable show. I am currently teaching animals as part of my science curriculum, and to have Joe come in and give the children a hands-on demonstration of what reptiles look and feel like gave them a lasting learning experience that no textbook could ever provide. Joe's vast knowledge of these animals is only overshadowed by his obvious concern for their well-being. His easy-going rapport with my students allowed them to feel comfortable, and they had many questions for him which he answered professionally and thoroughly. I would highly recommend Joe Kenney's "Crazy Critters" show to anyone teaching reptiles, or anyone in general who would like to see animals up close that you would not normally get to encounter. If you have any questions, please feel free to contact me.
